SUMMARY

Field network technician with 30+ onsite jobs for retail, healthcare, and banking clients, working as the onsite hands for remote NOC and engineering teams. CCNA, Cisco Enterprise Core Specialist (passed 350-401 ENCOR, the CCNP core exam), Fortinet NSE 4, and CompTIA Security+. Based in Queens and open to nights, weekends, and on-call shifts.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) Sep 2024
Cisco Certified Specialist - Enterprise Core (passed 350-401 ENCOR, the CCNP core exam) Sep 2026
Fortinet NSE 4 - FortiOS Administrator Jun 2026
CompTIA Security+ Sep 2025
Microsoft Certified: Azure Fundamentals May 2024
In progress: CCNP Enterprise (300-410 ENARSI) Verify: shuaibahmedportfolio.netlify.app/#certifications

EXPERIENCE

Field Network Technician (Smart Hands) Field Nation, independent contractor Jan 2025 – Present

- Completed 30+ onsite network and IT jobs for retail, healthcare, and banking clients, working with remote NOC and engineering teams from dispatch to sign-off.
- **Frost Bank:** Selected by help desk leadership as lead technician for a 300+ thin-client deployment; assigned tasks across technicians and checked quality before handoff.
- **Gentiva Health Services:** Restored hospital VoIP and internet during a live escalation by tracing MACs to switchports, finding a disconnected uplink with the remote NOC, and replacing a failing IP phone.
- **Best Buy:** Isolated power-related router instability during a deployment ahead of a Black Friday sales window and recommended corrective action before turnover.
- **Walgreens:** Restored network printing under live workload without replacing hardware.
- **Verizon 5G site survey:** Documented conduit pathways, telecom-room and rack layouts, cabling constraints, and equipment placement for carrier deployment planning.
- Support switches, routers, access points, IP phones, POS systems, and endpoints; write clear handoff notes for engineering.

PROJECTS AND LABS

write-ups at shuaibahmedportfolio.netlify.app/#labs

- **SNMP monitoring (EVE-NG):** Enabled SNMPv2c and SNMPv3 (MD5/DES) on three routers; polled uptime and 32/64-bit counters and decoded an ifTable walk OID by OID.
- **Active Directory and DNS troubleshooting (VMware):** Recovered a Windows 11 domain client by separating Layer 3 reachability from DNS-based domain discovery and stale machine-account state.
- **Home lab to Google Cloud (EVE-NG):** Rebuilt a home EVE-NG server as a 70-node cloud lab with nested virtualization and HTTPS, then wrote a post-mortem of a self-inflicted outage.
- **TopoDrawer (Python):** Built a faster interface for creating and managing EVE-NG topologies, with an automation bridge for live device configuration.

SKILLS

Networking: Cisco IOS, VLANs/802.1Q, STP/RSTP, EtherChannel, OSPF, EIGRP, BGP, ACLs, NAT/PAT, DHCP, DNS, IPv4/IPv6, VoIP
Security: FortiGate firewall policies and web filtering, 802.1X, SSH device hardening
Monitoring and tools: SNMP v2c/v3, Wireshark, EVE-NG, Cisco Modeling Labs, Packet Tracer, Active Directory, VMware, Azure, Linux, Windows, Python, PowerShell

EDUCATION

University of Maryland Global Campus B.S. Cybersecurity Technology Expected 2027
Houston City College (formerly Houston Community College) Associate degree, Computer Science 2026
