Professional Summary

Austin-based network and infrastructure technician with 10+ onsite contracts supporting deployments, troubleshooting, VoIP, network printing, rack and cabling documentation, and multi-technician coordination. Cisco Enterprise Core specialist and CCNA available for short-term network refresh, migration, cutover, rollout, and field implementation work.

Certifications

Cisco Certified Specialist - Enterprise Core (350-401 ENCOR), Sep 2026-Sep 2029 | Cisco Certified Network Associate (CCNA), Sep 2024-Sep 2027 | CompTIA Security+, Sep 2025-Sep 2028 | Microsoft Certified: Azure Fundamentals, earned May 2024

Fortinet NSE 4 - FortiOS 7.6 Administrator exam, passed Jun 2026

Technical Skills

Field deployment: Switch and router support, rack and patching work, structured cabling, switchport tracing, VoIP, site surveys, equipment placement, documentation, remote technical coordination

Routing and switching labs: Cisco IOS, VLANs, 802.1Q, STP/RSTP, Rapid PVST+, EtherChannel, OSPF, EIGRP, BGP, IPv4/IPv6, ACLs, NAT/PAT, DHCP, DNS

Tools: Cisco Modeling Labs, EVE-NG, Packet Tracer, Wireshark, Python, PowerShell, Linux, Windows, FortiGate

Relevant Experience

Independent Network and Infrastructure Technician | Contract engagements through

Jan 2025-Present

Field Nation

- Completed 10+ onsite technology and infrastructure contracts through Field Nation across retail, healthcare, and banking environments.
- Coordinated deployment of more than 300 thin clients during a Frost Bank engagement, assigning work and checking quality across multiple technicians.
- Documented conduit pathways, telecom rooms, rack layouts, cabling constraints, and equipment placement for a Verizon 5G carrier site survey.
- Restored healthcare VoIP and network connectivity by tracing a device MAC address to the correct switchport, identifying a disconnected switch uplink with a remote NOC, and replacing a failed legacy IP phone.
- Troubleshot infrastructure and network issues during Best Buy field work and coordinated remediation with remote technical support.

Selected Projects

Rapid PVST+ Campus Lab: Cisco Modeling Labs; built a redundant four-switch VLAN 10 topology, configured Rapid PVST+, verified root election and port roles, and recorded convergence evidence after an uplink change.

Cisco SSH Management Lab: Physical Cisco lab; recovered devices, planned management addressing, enabled SSH, and used ping, ARP, and SSH tests to isolate a duplicate-IP condition.

Education

University of Maryland Global Campus - B.S. Cybersecurity Technology, expected 2027 | Houston City College - Computer Science studies, 2019-2026
